EDUCATION

Indian Institute of Information Technology Guwahati

B.Tech in Computer Science and Engineering, CGPA: 6.6

2024 – 2028

Guwahati, Assam

EXPERIENCE

Full Stack Development Intern, Codec Technologies India

May 2026 – Jun 2026

HTML, CSS, Tailwind CSS, Vite, JavaScript, React (JSX), Node.js, MongoDB, Firebase, Socket.io, JWT, bcrypt

- Engineered a real-time chat application using React, Vite, and Socket.io, enabling instant one-on-one DM messaging and multi-user chat rooms with sub-second message delivery.
- Implemented secure authentication using JWT and bcrypt password hashing, with protected routes and persistent session handling across the application.
- Designed a premium, responsive UI with Tailwind CSS featuring live typing indicators, online/offline presence, and message read receipts to enhance real-time user experience.
- Built a Node.js/Express backend with MongoDB for persistent chat history and Firebase for real-time data sync, supporting concurrent multi-room conversations at scale.

Backend Development Intern, Skillfied Mentor

Jun 2026 - Present

Node.js, Express.js, JWT, bcrypt

- Designing and developing secure authentication APIs registration, login, and refresh token issuance using Node.js, Express, and JWT as part of an assigned backend development project centred on production-grade security practices.
- Implementing hashed password storage, input validation, and Refresh Token Rotation (RTR) with short-lived access and 7-day refresh tokens, following secure token lifecycle best practices (full build detailed under Projects).
- Currently building a Blog API service covering CRUD operations, authentication-projected routes and structured data modelling using Node.js and Express. (In Progress)

PROJECTS

SkillSync – AI-Powered Recruiter Resume Ranker

Jun 2026

Python, Hybrid Semantic Search, Cosine Similarity Caching, Explainable AI, Embeddings • [GitHub](#)

- Built a production-grade, fully offline candidate discovery and hybrid ranking system for the India Runs Hackathon 2026 (AI Recruitment Intelligence track), designed to match 100,000+ candidates against a target job description with high accuracy and speed.
- Designed strategic honeypot and trap filters for fraud detection alongside 20+ recruiter-inspired ranking features to improve match precision and explainability.
- Implemented flat cosine semantic caching for CPU-optimized similarity search, enabling fast large-scale ranking without GPU dependency while meeting strict resource constraints.
- Architected a 100% offline AI pipeline with zero data exfiltration, semantic document synthesis, and Explainable AI (XAI) justifications for every candidate ranking decision.

Authentication & Submission Portal

Jun 2026

React, Vite, Node.js, Express, MongoDB (Mongoose), JWT, bcryptjs, adm-zip, Multer, jsonwebtoken • [GitHub](#)

- Built a glassmorphic Developer Assessment Portal for managing intern project submissions, enabling real-time ZIP file inspection and automated code compliance verification.
- Implemented secure Refresh Token Rotation (RTR) with 15-minute short-lived access tokens and 7-day refresh tokens; reuse of a rotated token instantly revokes the entire token family to mitigate theft.
- Engineered unique jti claims on all tokens to prevent race-condition key clashes, and secured all stored credentials using bcryptjs password hashing.
- Designed an interactive API Sandbox with a live JWT Claims Decoder, letting developers fire test requests and inspect real-time token rotation, claims, and expiration.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 120+ Data Structures & Algorithms problems and actively building consistency in competitive programming.
- Built SkillSync, an AI-powered recruitment ranking system, for the India Runs Hackathon 2026 (AI Recruitment Intelligence track).
- AICTE & ICAC Certified – Full Stack Development Internship (1 month), Codec Technologies India — Certificate of Completion.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, SQL

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Authentication & Security, Blockchain, Prompt Engineering, Agentic AI, Introduction to LLMs, Embeddings, Semantic Search

Frameworks/Technologies: React, Node.js, Express, MongoDB, MySQL, Tailwind CSS, HTML, CSS, Firebase, JWT, Socket.io, NumPy, Pandas, SWI-Prolog, JSON

Developer Tools: VS Code, Cursor, Antigravity, Git, GitHub, Postman, Jupyter Notebook

Deployment/Platforms: Vercel, Render, RailWay
